Data Center Overview

Our global data centers provide enterprise-grade, redundant infrastructure, and security for Forensic Technology Services. These facilities meet strict compliance requirements for all industry standards, such as PCI DSS, SOC, and HIPAA. The data centers also incorporate rigorous infrastructure and physical security features including full CCTV surveillance, biometric key card access, 24/7 security guards, and more to ensure that client data is secure and available.

Resolution Economics has an expanding data center footprint. In addition to the current DC, LA, and London, UK locations, we have immediate expansion capabilities in other Europe and Asia-Pacific regions. For more information, please contact FTS-PM@resecon.com.

Data Centers Include:
- Mission critical controls and monitoring
- N+1 system redundancies for all critical infrastructure components
- Highly connected with multiple Tier 1 and Tier 2 providers and multiple exchanges for peering

Security & Reliability
- Key card access
- Biometric scanners
- Double mantrap entry
- Perimeter and interior IP-DVR cameras
- 24/7/365 in-house security guards
- Controlled site access (DC data center)
- 8' perimeter fence and controlled access (LA data center)
- Two diverse DVP substations (DC data center)
- Diverse utility feeds (LA data center)
- 2N redundancy on generators, UPSs, PDUs, and RPPs (DC data center)
- N, N+1, 2N UPSs, PDUs, and RPPs (LA data center)
- 100% concurrently maintainable (DC data center)
- 24 hour of on-site fuel storage (LA data center)
- N+1 campus cooling towers and chiller plan and N+1 in-room AHU (DC data center)
- N+1, chillers, CRAHs, and chilled water pumps (LA data center)

Certifications and Compliance
- ISO 27001
- SOC 1 Type 2 and SOC 2 Type 2
- PCI DSS
- Infrastructure and physical standards for HIPAA compliance
- Energy Star (DC data center)

Help Desk
- 24/7 technical help desk support
